INCIDENT MANAGEMENT SITUATION REPORT THURSDAY, SEPTEMBER 7, 1995 - 0530 MDT NATIONAL PREPAREDNESS LEVEL II

*** ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT ***

Current Situation: Cooler temperatures have moderated fire activity in the Northwest, Northern Rockies and Rocky Mountain Areas. Resource mobilization through NICC decreased yesterday. Hurricane Luis tracked north of Puerto Rico and the Virgin Islands allowing the cancellation of the Southern Area Type II team.

Northwest Area Large Fires:

CHELAN COMPLEX, Wenatchee N.F. A Type I Incident Management Team (Wands) is assigned. No new information was received.

OVERHOLD, Malheur N.F. No new information was received.

Northern Rockies Large Fires:

CROWN BUTTE, Crow Agency, BIA. A Type II Incident Management Team (Hancock) is assigned. Control problems are variable fuel types with some heavy fuels.

DUNN RIDGE, Lewistown District, BLM. A Type II Incident Management Team (Bullis) is assigned. Control problems are gusty winds, steep terrain and inaccessible terrain. Threats are to grazing allotments and range improvements.

OUTLOOK: The upper level low pressure system over western Washington will continue to slowly move east. As this low moves across the Pacific Northwest it will bring mostly cloudy skies with a chance of showers and afternoon thunderstorms across Washington, northern Oregon, northern and central Idaho and western Montana. Monsoon moisture continues to cycle over southern California and Arizona, moving into Colorado and Western New Mexico. Widely scattered, mainly wet afternoon thunderstorms will develop with locally heavy rainfall expected in Arizona. The rest of the West will be warm and dry, with temperatures ranging from the 60's and 70's in the Pacific Northwest to 115 degrees in the Southwest deserts. Fire activity is expected to remain moderate with cooler temperatures entering the Northwest and northern Rockies.
